## Features

- The closure adopts heat shrinkable sealing structure. There is one big oval shaped inlet/outlet port in base. The big oval shaped port is used for the sealing of uncut straight-through fiber cable, the small ports are used for branch fiber cable and drop cable.
- It adopts engineering PC plastic with high-strength to make the closure has longer life time and excellent sealing performance.
- The patented sealing structure keep good sealing performance after re-entry and re-using.
- It is without cable fixing device.
- The bending radius of FOSTs meet the international standard.
- It could save the installation time and improve work efficiently.

Applications

- Suitable for bunchy & ribbon fibers
- Aerial, underground, wall-mounting, hand hole-mounting pole-mounting and duct-mounting
